Top Skills

Cybersecurity

Machine Learning

Python (Programming Language)

Certifications

Defending Against DDOS Attacks Using AED

Hands-on Introduction to Linux Commands and Shell Scripting

Data Analysis Fundamentals

AI Agent Engineering, AI Evaluation Engineering, and Forward Deployed Engineering Training

DevSecOps: Automated Security Testing Fundamentals

Martha Ketsela Mengistu

Forward Deployed Engineer | AI Agentic Engineer | API Integration Developer

Addis Ababa, Ethiopia

Summary

I am a Forward Deployed Engineer and AI Agent Engineer with hands-on experience building production-grade agentic AI systems, evaluation frameworks, data platforms, and cybersecurity infrastructure. Through 10 Academy's TRP intensive training, I completed 720+ hours of project-based work in AI Agent Engineering, AI Evaluation Engineering, and Forward Deployed Engineering, graduating with Distinction. My work included multi-agent systems with LangGraph, multi-database analytics agents, automated lead-generation workflows, document intelligence pipelines, LLM evaluation harnesses, and fine-tuning experiments published on Hugging Face. Before TRP, I completed 10 Academy's Kifiya AI Mastery Program, where I built practical machine learning and data engineering projects including ELT pipelines with dbt and Dagster, a RAG-powered complaint chatbot, fraud detection models using XGBoost and SHAP, and a production credit risk API with MLflow and CI/CD. In my current role as a Junior IT Security Officer at Bunna Bank, I work across identity, security, DevSecOps, and observability. I contribute to secure CI/CD pipelines with GitLab, SonarQube, and OWASP ZAP, and build monitoring infrastructure with Elastic Stack and Grafana. I enjoy building systems that connect AI capability with real operational needs: reliable agents, measurable model behavior, secure platforms, and tools that help teams make better decisions.

Experience

Bunna Bank

2 years 4 months

API Integration Developer

June 2026 - Present (2 months)

Addis Ababa, Ethiopia

Junior IT Security Officer

April 2024 - June 2026 (2 years 3 months)

Ethiopia

- Managed user access control across multiple systems, ensuring secure provisioning, auditing, and de-provisioning in alignment with ISO 27001 standards.
- Conducted user access audits to maintain security compliance and reduce insider threats.
- Collaborated with teams to implement and enforce security policies, increasing awareness and minimizing potential vulnerabilities.
- Deployed and configured the ELK Stack (Elasticsearch, Logstash, Kibana) to centralize log management and enhance threat detection capabilities.
- Built custom Kibana dashboards to visualize real-time security logs and operational metrics, improving incident response time and system visibility.
- Participated in DevOps and DevSecOps processes, integrating security into CI/CD pipelines using GitLab and SonarQube for code quality and vulnerability assessments.
- Supported vulnerability assessments contributing to stronger system hardening and risk mitigation.

InterTechHub

Data Scientist Intern

November 2024 - May 2025 (7 months)

- Cleaned and preprocessed raw datasets using Pandas and NumPy, preparing them for downstream analytics and modeling.
- Performed exploratory data analysis (EDA) using Seaborn and Matplotlib to uncover patterns and anomalies.
- Developed a predictive model for employee attrition using IBM's HR Analytics dataset; used logistic regression, decision trees and random forest to predict attrition with ~87% accuracy.
- Built an end-to-end data pipeline for an eCommerce use case: automated ETL process (data extraction, transformation in Python and data storage in SQLite Database).
- Designed and deployed an interactive dashboard in Tableau showcasing KPIs like revenue, number of transaction, Average Order Value (AOV) and customer segmentation.

Hisense TransTech

Software Engineer

August 2023 - April 2024 (9 months)

Ethiopia

- Prepared and maintained detailed technical documentation to support software development and implementation processes.
- Conducted ICT training sessions for clients, enhancing their understanding of system usage, and digital literacy.

Education

Addis Ababa University

Bachelor, Computer Science · (October 2019 - July 2023)

10 Academy

AI Agent Engineering, AI Evaluation Engineering, and Forward Deployed Engineering · (February 2026 - May 2026)

10 Academy

Kifiya AI Mastery Training Program (SAFE KAIM), Machine Learning Engineering, Data Engineering, and Financial Analysis · (May 2025 - August 2025)
